# 8. Administrators

Manage your administrators for accessing your Cloud Desk 3 installation.

1

You can create unlimited administrators for your business, they can also manage all or certain areas of your Cloud Desk 3 installation.

2

The administrator page will show you all created admins.

3

Clicking on the username or edit button brings you to the edit form.

8.1 Administrator Settings

The main settings explained.

4

Setup different permissions for each of your administrators. Checking all will have all permissions. Special permission can be given by adding the user to the super operator area.

5

Adding a user to the super operator list will give him all permission. Simply open your include/db.php file and add the admin ID to the define('JAK_SUPERADMIN', '1'); var.

6

By clicking on the green "Submit" button you save the form.
