

Live Chat Template

How it works?

</> Widget Code and Link

To install the live chat on your website, please copy & paste this code above the last `</body>` tag. 

```
<!-- Live Chat 3 widget -->
<script type="text/javascript">
(function(w, d, s, u) {
  w.id = 1; w.lang = ''; w.cName = ''; w.cEmail = ''; w.cMessage = ''; w.lcjUrl = u;
  var h = d.getElementsByTagName(s)[0], j = d.createElement(s);
  j.async = true; j.src = 'http://livechat3:8888/js/jaklcpchat.js';
  h.parentNode.insertBefore(j, h);
})(window, document, 'script', 'http://livechat3:8888/');
</script>
<div id="jaklcp-chat-container"></div>
<!-- end Live Chat 3 widget -->
```

Use the link below in your emails or any other marketing source. 

There has been nothing changed from how you place the chat widget onto your website, this way an upgrade will be fairly simple.

The live chat will be placed onto your website by copying a provided code and paste it into your website footer file right before the closing body tag. It is important to have right at the end at your website for performance and display reasons.

After placing the chat widget into your website footer file or any file that has the last closing body tag you will see the blue button at the bottom - right.

Important in case you cannot see the button, make sure to whitelist the URL in your operator panel on the widget management page. More information: <https://www.jakweb.ch/faq/a/175/widget-whitelist-crossdomain>
