

12. Billing Packages

1

Quick Statistics about your billing packages. It contains a Total, busiest, total and last changes.

2

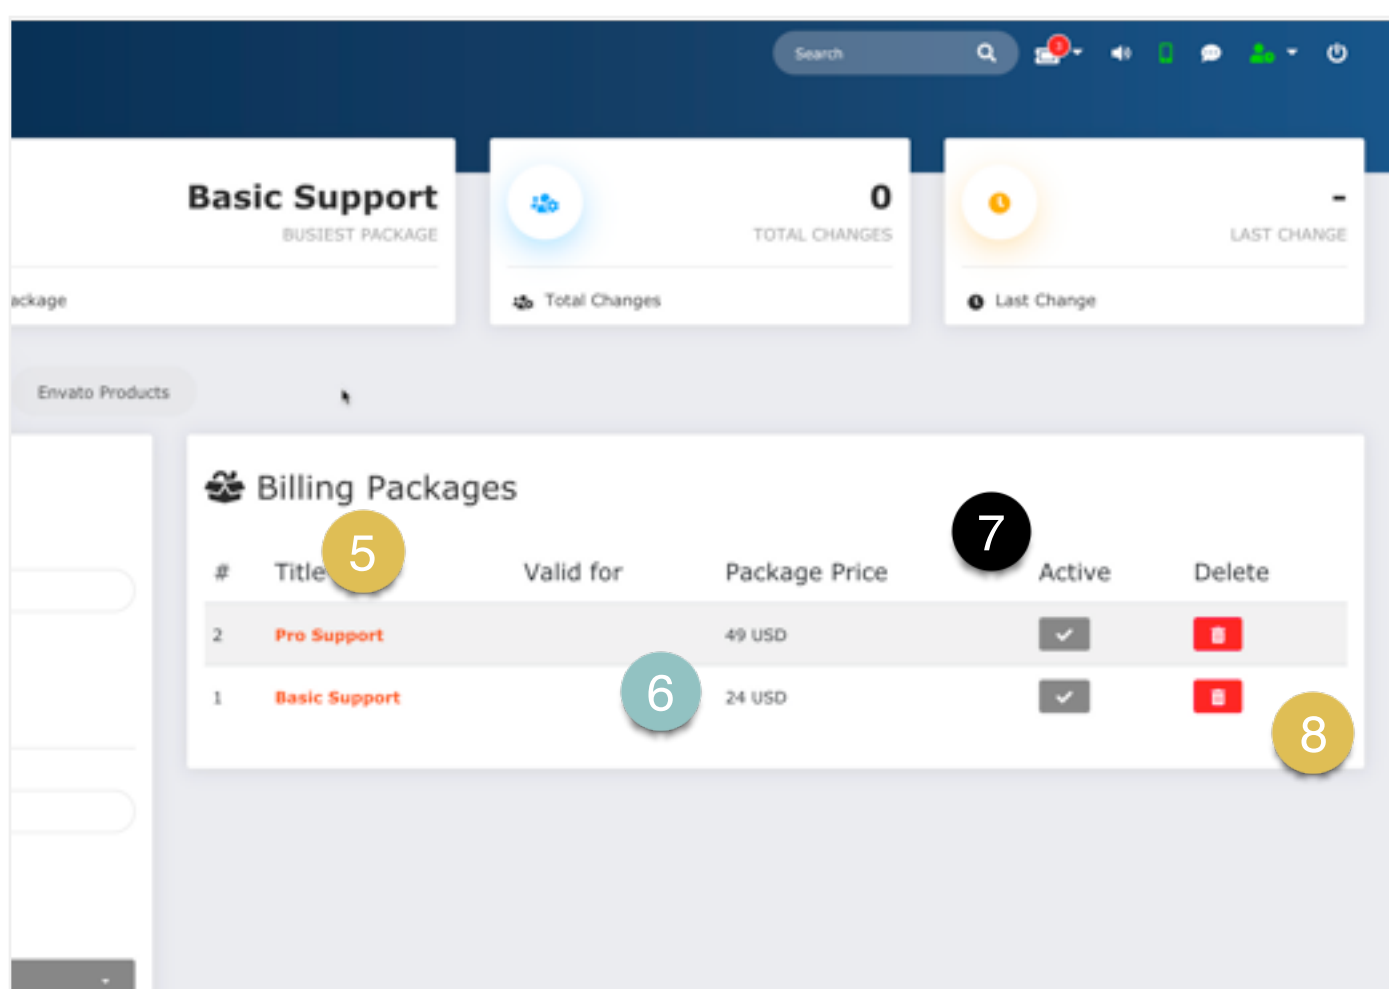

Quick navigation for Paid Subscriptions, Billing Packages and Envato Products.

3

A form to create a new billing package. There is no limit in total packages.

4

All created billing packages are listed in the table.

5

Edit a billing package by clicking on the title.

6

Should the package be valid for x days it is listed here, next to it you see the package price plus currency.

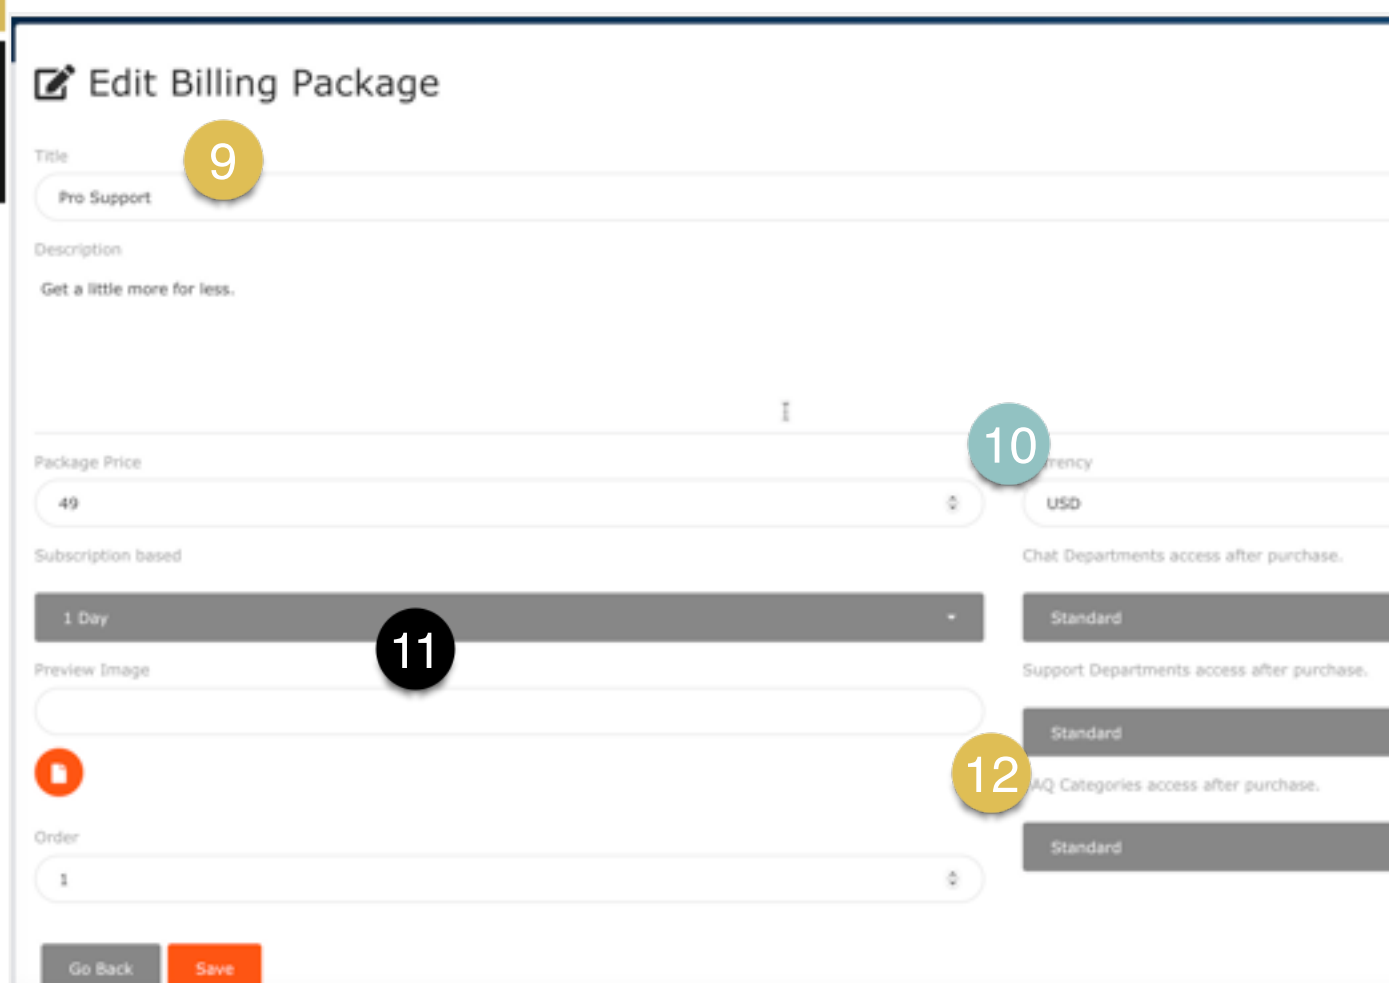

7

Here you can deactivate or activate a billing package. A "Check" means the package is activated, a "Lock" means the package is inactive.

8

Delete a billing package with the "Red Delete Button".

Edit Billing Package

9

Edit "Title" and "Description" for the billing package. It is always a good idea to describe what your client gets in return.

10

The billing package price and currency. Make sure to accept the currency in your Paypal, Stripe or other payment provider.

11

Add a preview image for your billing package.

12

Select any departments or categories, this is what permission the client gets after the purchase. Leave it on "Standard" if no change is necessary.
