

8. Blog

1

The Blog Statistics are displayed in the 4 boxes on top.

2

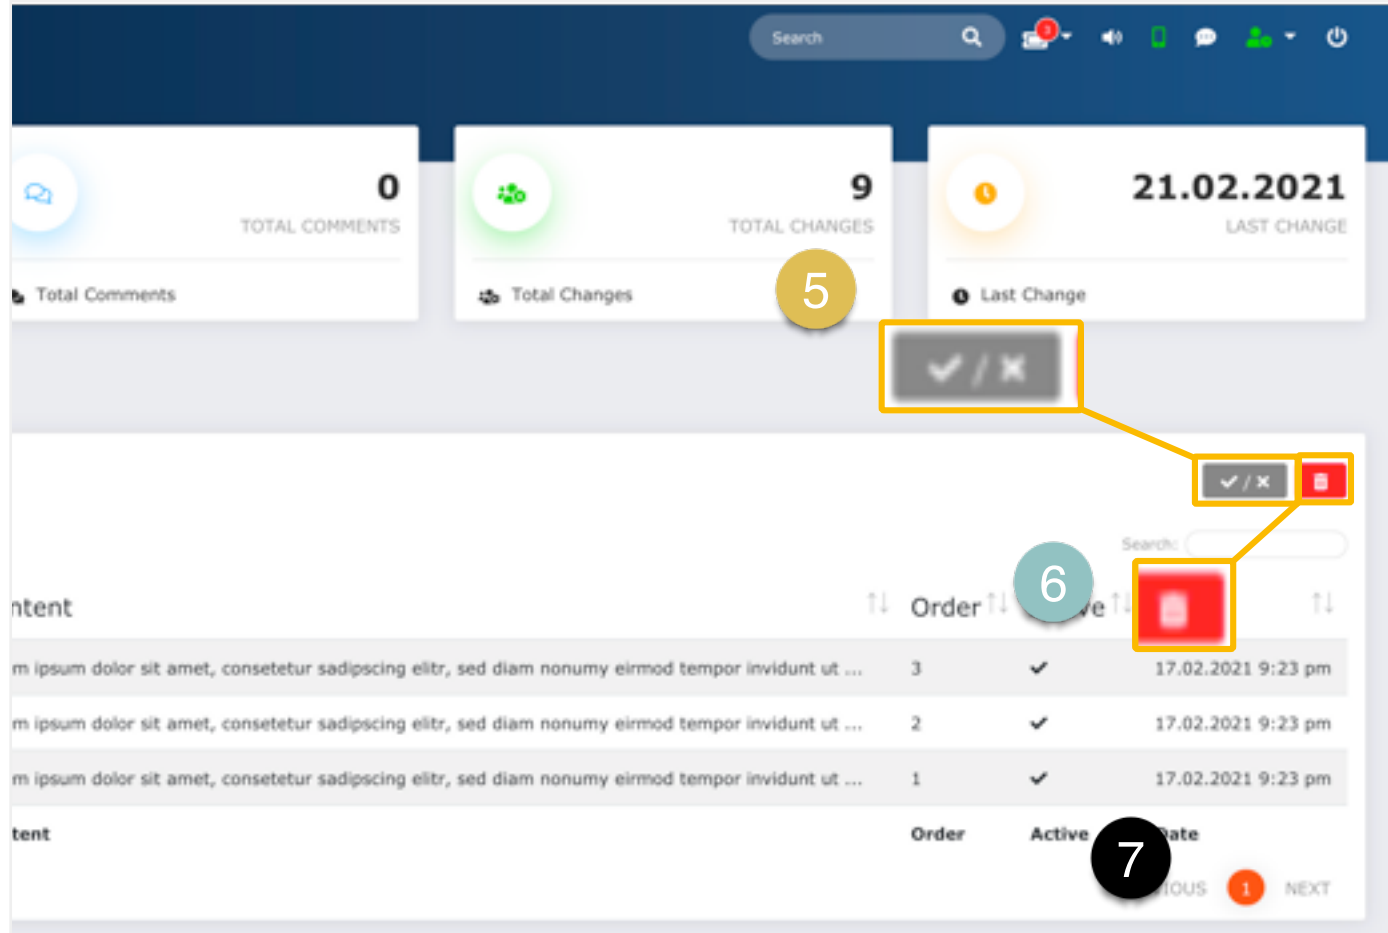

Create a new Blog Article.

3

All Blog Articles are shown in the table. You can do the same as with all tables. Sort them with the small arrows next to each column.

4

Select a Blog Article or select multiple and modify them if you wish so (see number 5 and 6).

5

All selected Blog Articles will be set active or inactive depend on their status. Inactive Blog Articles are not shown in the front

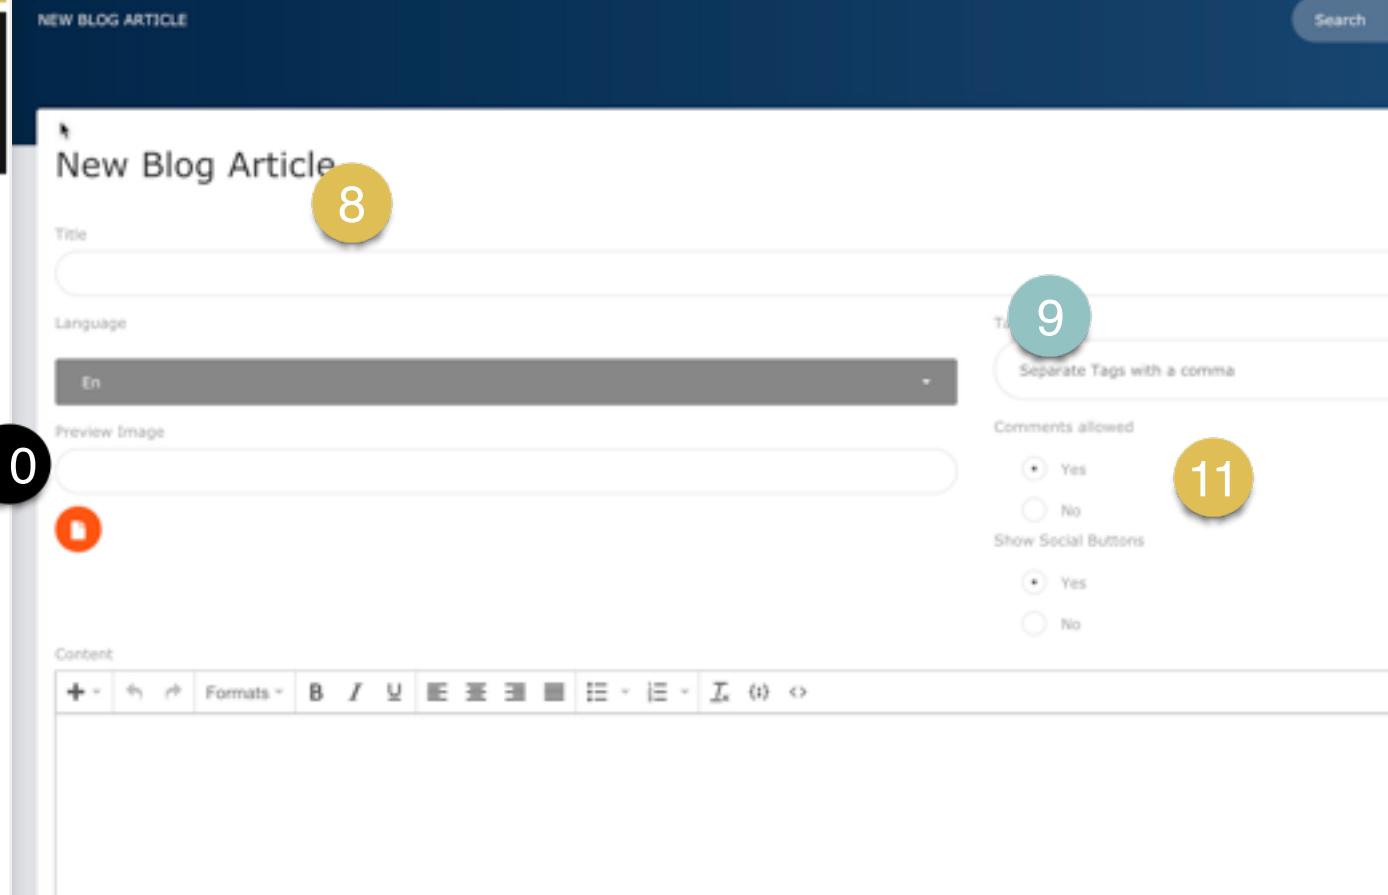

6

Will delete the selected Blog Articles.

7

The pagination to go through all Blog Articles can be found here. 5 pages are always cached (50 Articles) for quick access.

New Blog Article

8

In the title input field you set the Blog Article title.

9

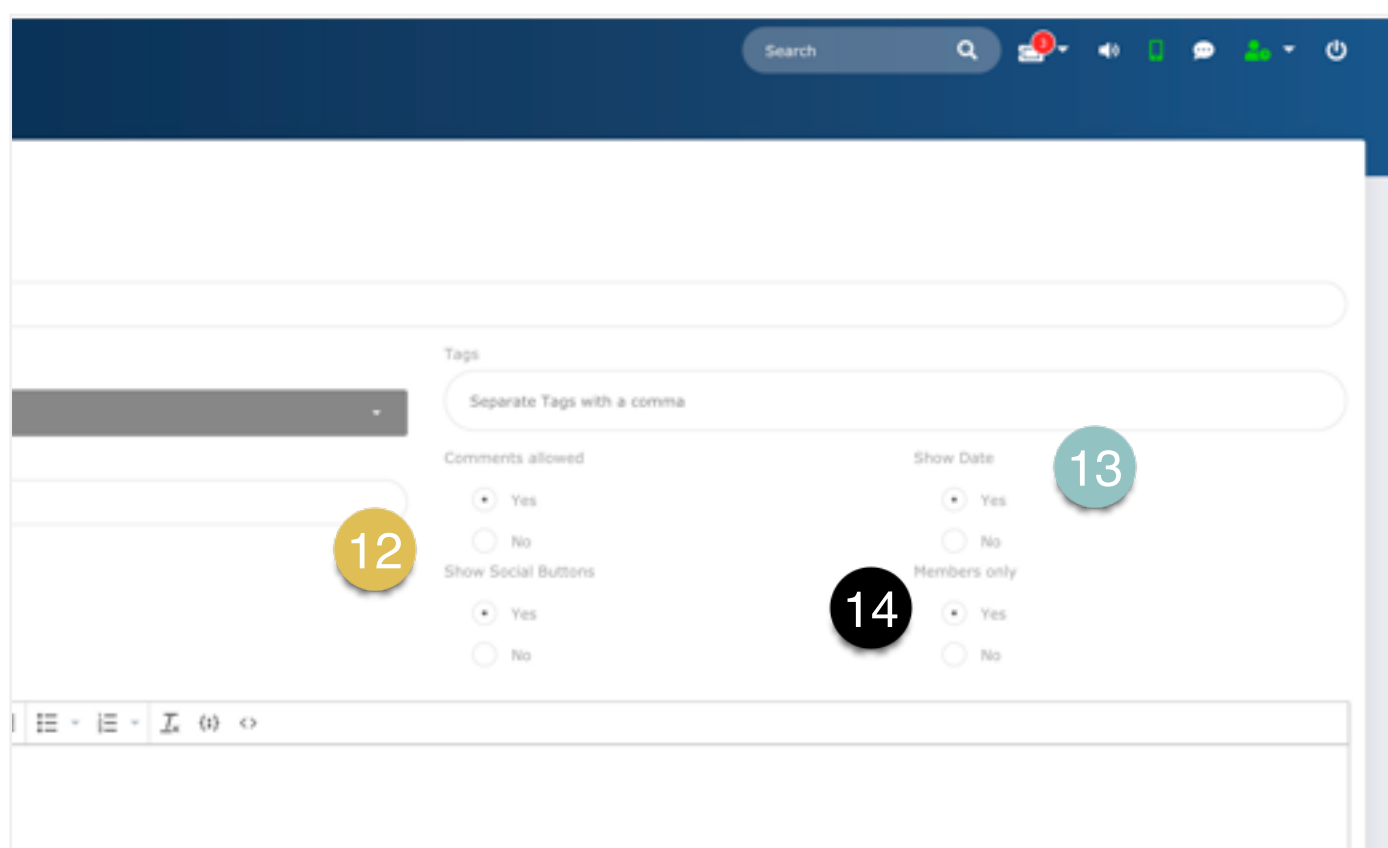

You can set some tags for each for each Blog Article. That will improve search results.

10

Select a preview image that will be shown on the Blog Articles overview on the front end and in the header on the article itself.

11

Decide if comments are allowed or not.

12

Decide if the social sharing buttons are displayed on this article or not.

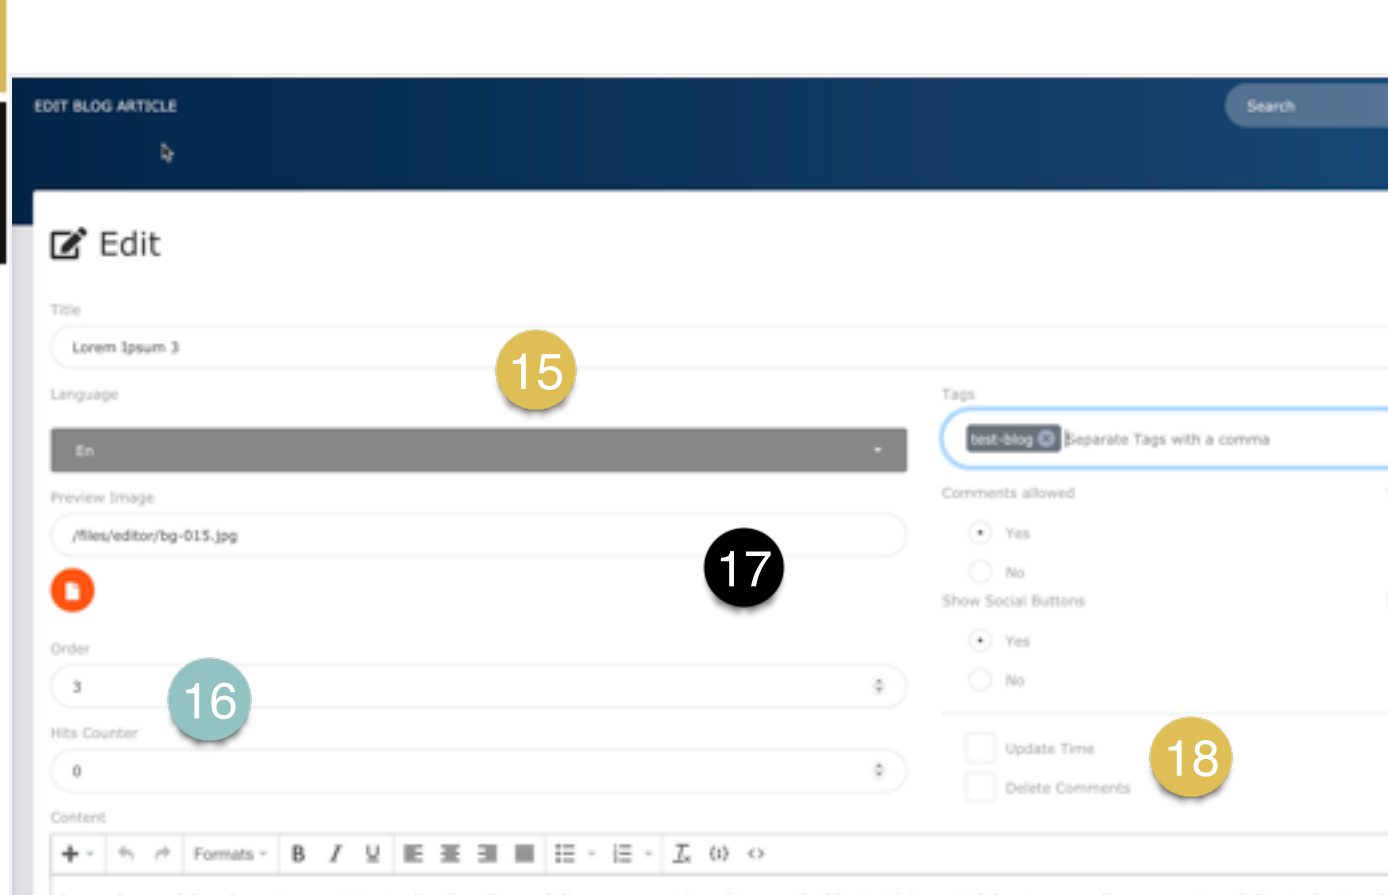

13

You can display the date when the article has been created or not.

14

Finally decide if the article is public or only visible to your members / clients.

Edit Blog Article

15

When you edit an Blog Article, all fields are pre filled with the information you have entered before.

16

There are two extra fields, one to change the order of the article and one to reset or modify the hits counter.

17

The preview image path can be changed of course and it can also be outside of the file- and image manger.

18

You have two options here, one to update the time of the Blog Article and the other one to delete all comments from this Article.
