

42. Email Settings

The screenshot shows the 'Email Protocol' settings page. At the top, there are four tabs: 'General Settings', 'Support Settings', 'FAQ Settings', and 'Blog Settings'. The 'Email Protocol' section is active. It features a title 'Email Protocol' with an envelope icon. Below the title, there are two radio button options: 'Mail()' and 'SMTP'. The 'Mail()' option is selected. Below the radio buttons, there is an 'Email Address' field containing 'jakweb.ch@gmail.com'. At the bottom of the form, there is a green button labeled 'SMTP/Mail Test' and an orange button labeled 'Save'. Numbered callouts are placed over the interface: '1' is over the title, '2' is over the 'Mail()' radio button, '3' is over the email address field, and '4' is over the 'SMTP/Mail Test' button.

1

Set how the system should send the emails. There are two options: PHP Mail () or SMTP. Please note if PHP Mail() is used the email address needs to be registered on the server (same domain).

2

Set the Email Protocol. For more information: <https://www.jakweb.ch/faq/a/95/smtp-email-settings>

3

The email address used to send the emails. The reply email address is the main email address on the general settings page.

4

The "Green" test button will send a test email, please make sure you receive the test email before starting with support.
