

7. FAQ

1

The FAQ Statistics are displayed in the 4 boxes on top.

2

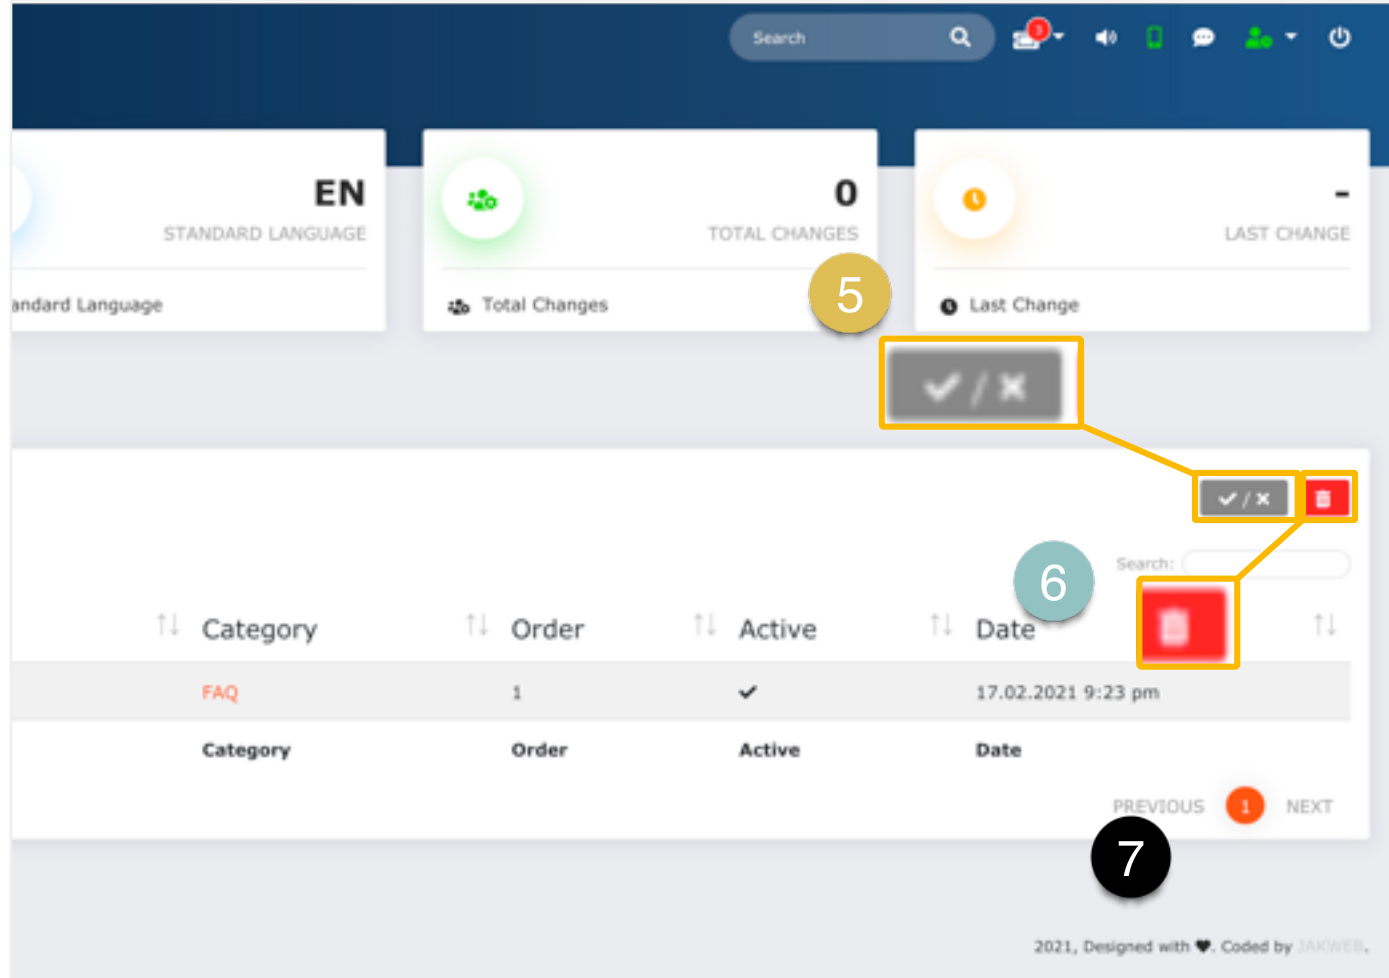

Create a new FAQ article.

3

All FAQ Articles are shown in the table. You can do the same as with all tables. Sort them with the small arrows next to each column.

4

Select a FAQ Article or select multiple and modify them if you wish so (see number 5 and 6).

5

All selected FAQ Articles will be set active or inactive depend on their status. Inactive FAQ Articles are not shown in the front end.

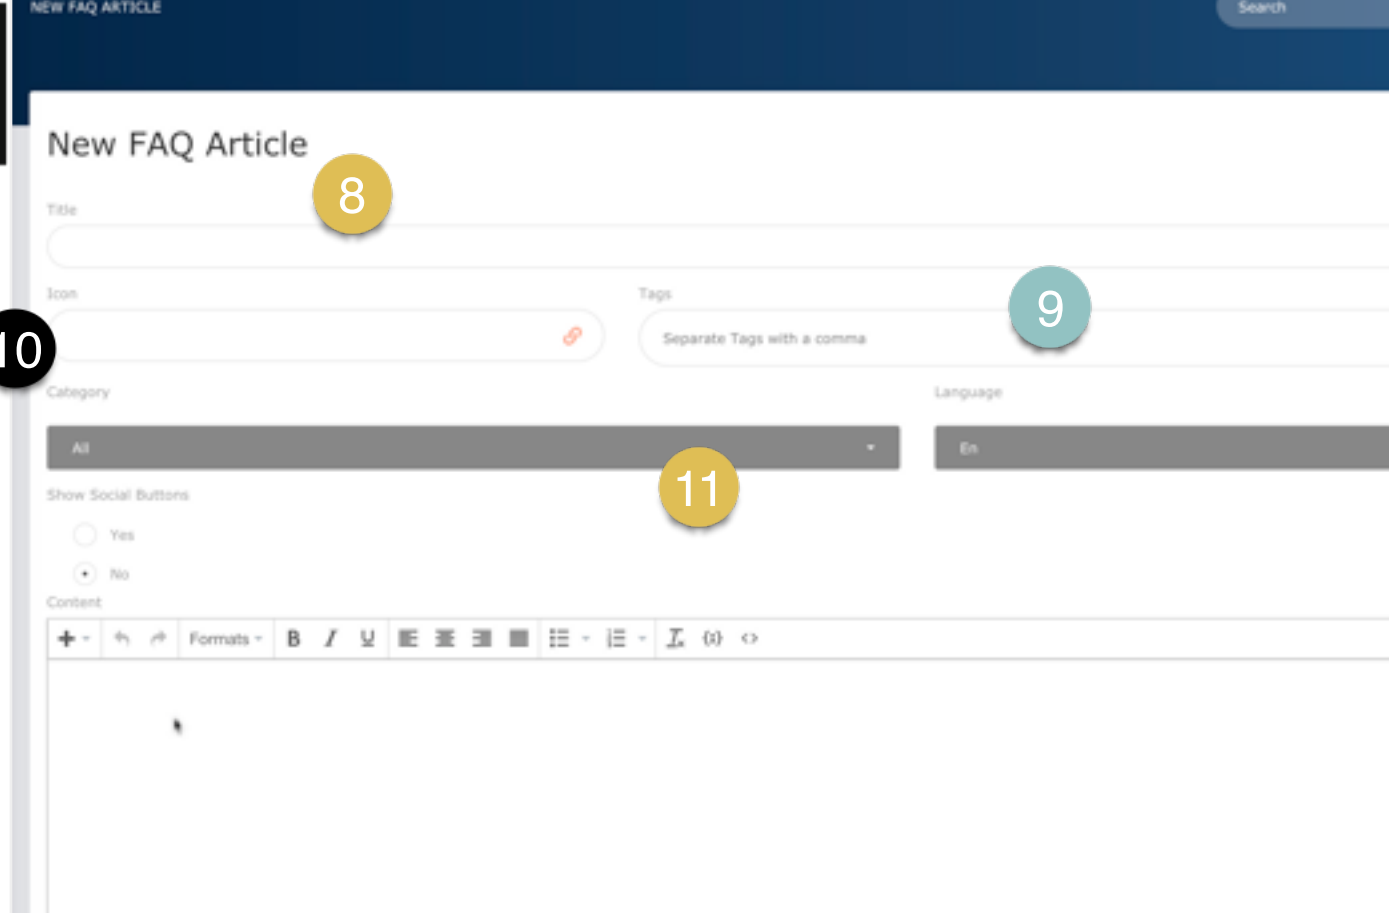

6

Will delete the selected FAQ Articles.

7

The pagination to go through all FAQ Articles can be found here. 5 pages are always cached (50 Articles) for quick access.

New FAQ Article

8

In the title input field you set the FAQ Article title.

9

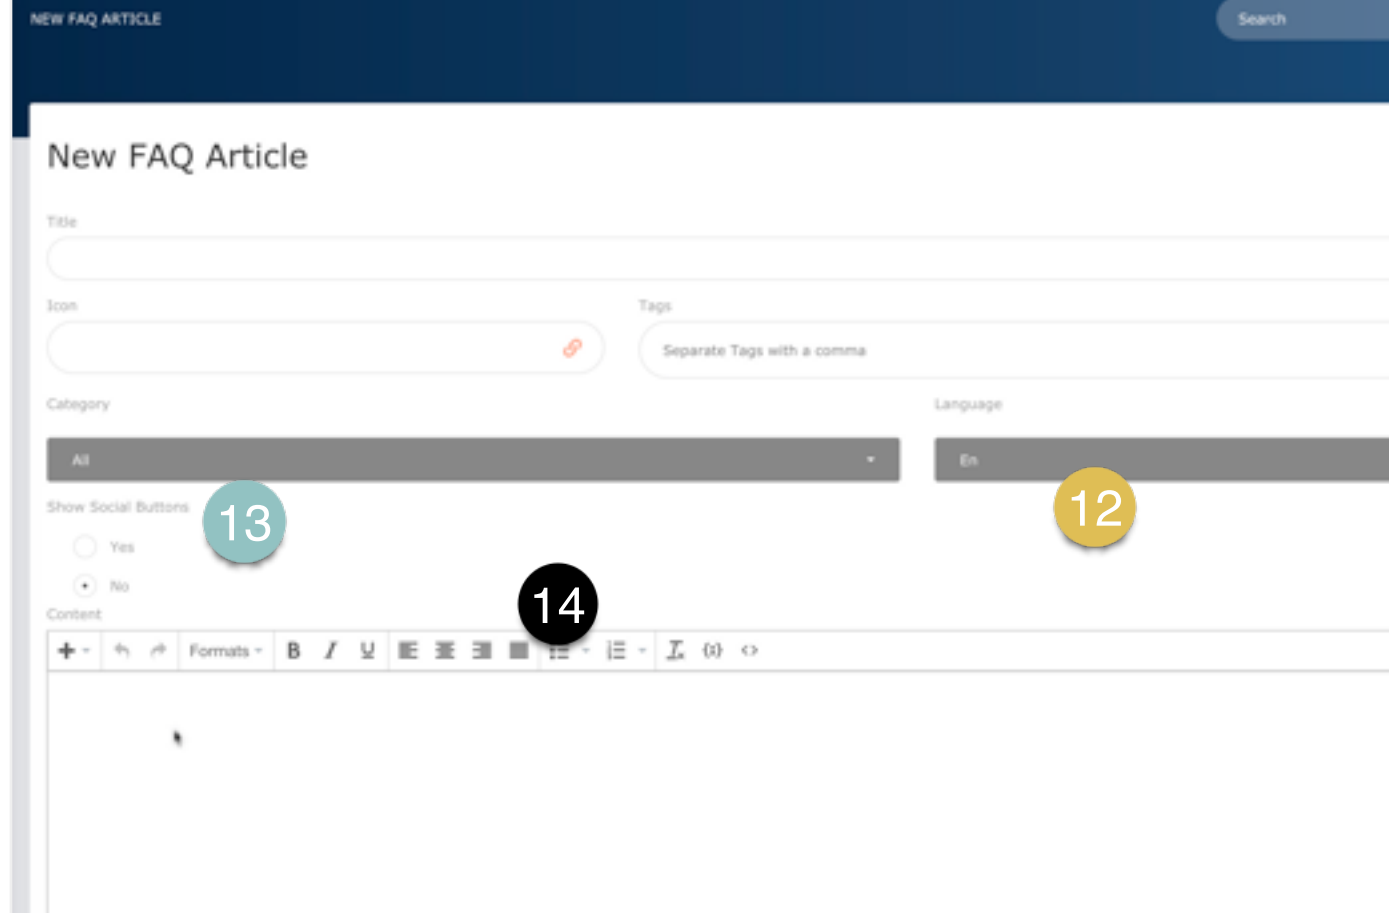

You can set some tags for each for each FAQ Article. That will improve search results.

10

Select an icon that will be shown on the FAQ Articles overview on the front end.

11

Finally select the category where the FAQ Article belongs.

12

Set a language for this FAQ Article. If you have more than one language you will need to create an FAQ article for each language.

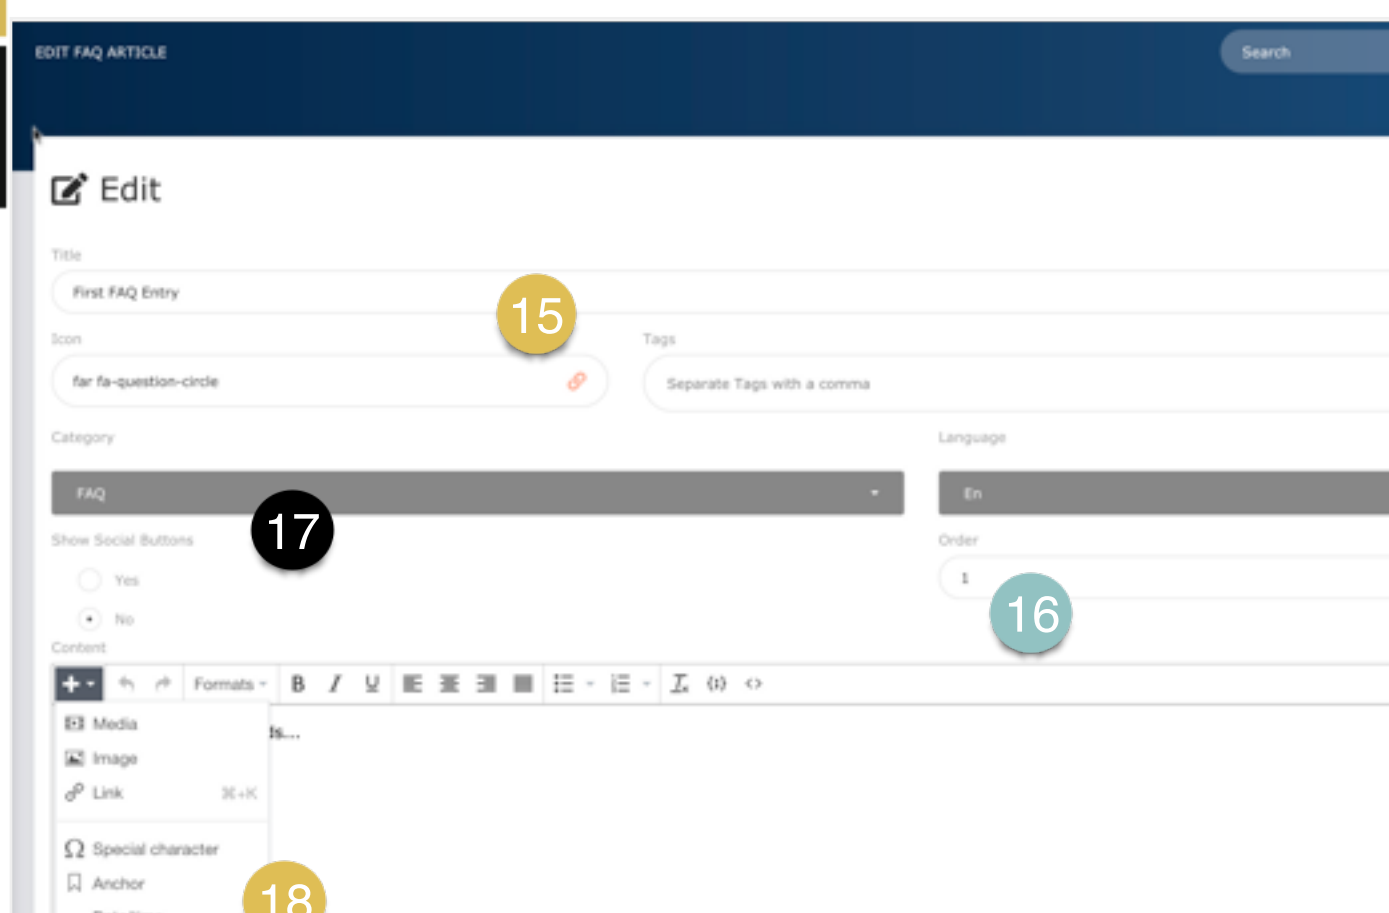

13

Choose to show the social sharing buttons.

14

The content of the FAQ Article comes here. The wysiwyg editor will give you plenty of styling options.

Edit FAQ Article

15

When you edit an FAQ Article, all fields are pre filled with the information you have entered before.

16

There is an extra field if you like to change the order of the FAQ article.

17

The category is pre select as well but can be changed. The FAQ Article will then be moved to the new category.

18

The wysiwyg editor has also a build in File- and Image Manager for easily managing your files.
