

31. URL Black List

1

Simple but great feature. You can add any sub page of your website where you don't want to show the live chat widget. Please note it will show anyway when a customer has open a active conversation.

3

All added URL's will be shown here.

2

The form to add a new URL for blocking the Live Chat on this page.

4

Edit and Delete the URL's as always by clicking on the "Title" or "Edit" button. Delete them by clicking on the "Red" button.
